RANDOLPH

Marriage of Miss Jessie Chedel and Lewis Flint Saturday Evening.

The home of Mr. and Mrs. G. A. Chedel on School street was the scene of a very pretty wedding on Saturday evening when their daughter, Miss Jessie Chedel, was united in marriage to Lewis Flint of Burlington, the only son of Mr. and Mrs. Hale Flint of this town, Rev. Fraser Metzger officiating, assisted by Rev. E. E. Herrick of Milton, the latter being the grandfather of the groom. The double ring service was used in the ceremony. bride was becomingly gowned in white satin with chantilly net, in court train, and veil caught with orange blossoms and carried a shower bouquet of white roses and lilies of the valley. She was attended by her sister as matron of honor, Mrs. Harold Gaylord, who was gowned in white satin with silver lace and carried a bouquet of pink roses. Miss Evelyn Denney of Claremont, N. H., was one of the bridesmaids, and wore pink ation on Mrs. John McMillan should have taffeta, with georgette crepe, and Miss named Dr. O. V. Greene as co-operating Luelle Grant of this place acted as bridesmaid and wore blue georgette crepe, both O. D. Greene. bridesmaids carring bouquets of pink now a teacher in Jeffersonville. The of the wedding march, played by Miss on that afternoon at the Greene sana Genevieve Foss of Tilton, N. H., and un- torium and is in a critical condition. She der this bower the marriage vows were was found to have a ruptured appendix, said. Following the ceremony, refresh- and the case was nearly, if not quite ments were served by the following hopeless. friends of the bride, Miss Ruth Roundy of Worcester, Mass., Miss Hazel Durkee of Pittsfield, Misses Gladys Gallup, Ann Squires, Violet and Bertha Johnson, Carrie Linekin, teachers in Springfield. The decorations were of snap dragon, palms, ferns and evergreen, the latter being festooned in the form of a canopy and also being in decorations about the room. The pillars upon each side of the arch were of white and wound with evergreen. The groom was graduated from Randolph high school and from the University of Vermont in 1914, and now is instructor in botany in that college. The bride is one of the most accomplished and popular young ladies in town, and she also was a graduate of the Randolph high school, a student in Tilton seminary, and was graduated from Wellesley college in 1915, and since that time has been a teacher in the high school at Springfield. The families, who witnessed the ceremony and the friends present numbered about 60. Mr. and Mrs. Flint left for a few days' stay at Mascoma lake, Entield, N. H., and after June 1, will be at home at 190 South Willard street, Burlington. The gifts were very beautiful and numerous, and consisted of silver, linen, cut glass, china, all testifying to the love and esteem in which the bride was held. The guests from out of town were: Dr. and Mrs. C. B. Chedel and daughter of Portland, Conn., Robert Chedel, just returned from the American ambulance hospital in France, Mr. N. J., Mr. and Mrs. Guy Hodgkins, John Chedel, Miss Alice Chedel of Gaysville, Miss Marguerite Whitcomb of Boston, Miss Mary Adams of North Andover, Mass., Ralph Twitchell of White River Junction, Rev. E. E. Herrick of Milton, Mrs. W. D. Hamilton of Hyde Park, Miss Myrtic Gifford of Montpelier, Miss Josephine Dana of New Haven, Conn., Miss Jennie B. Carruthers of Burlington.

ipon the soldiers. His flagman placed windfall and cull apples by evaporation more than 20 loads per acre on corn Urge each family, either in village or country, to adopt every possible means all available manure.

to make it self-sustaining in the matter of food supply.

2. Production for Market. (a) Produce Perishable Products for Home Markets: 1. Where canning factories are available. 2. Where there is a

(b) Potatoes: Efficiency in handling the crop is more important than a large increase of acreage. (c) Beans: Where conditions are fa-

vorable, farmers who have experience should raise all the beans possible for market. (d) Spring Wheat: Should be grown where the practice seems justified. (e) Pork: Raise all the pork possible

for home consumption and sell the surplus in the markets. (f) Dairy Products and Beef: I. En courage increased milk production as follows: (See outline in Dairy Project). 2. Turn unprofitable cows into beef for

home consumption and market surplus. 3. Production for Feeding Purposes.

(a) Encourage an increased acreage of soy beans and corn silage. Advise the use of the Medium Green soy beans at any reasonable price for seed; or, if the Medium Green seed is not available, use Roosevelt, Mongol, etc. (See Vermont experiment station bulletin 204, free for the asking. Address Experiment Station

Burlington, Vt.) (b) Recommend the breaking up of thin meadow lands to be sown to oats and peas as a hay, grain or silage crop. (c) Encourage the growth of wheat, in

(d) Advise an increased acreage of barley, oats, buckwheat, India wheat and corn for grain for the stock. Especial emphasis should be placed on the advisability of raising as much grain as possible. Publicity should be given to the comparative food values of the different grains, their probable acre yields, and the

cost of growing them. (e) Advise the growth of Dwarf Essex rape for hog pasture.

(f) Where silage is not available for the summer feeding of dairy cows, outline a system of summer soiling which shall include as many legumes as pos sible (peas and oats, soy beans). Recommend strongly the inocula-

ing large yields, especially in view of the decided shortage of labor. 4. Control of Plant Disease and Insect

lection of all seeds as a means of obtain-

In view of the vital need for maximum production and because of the high cost of seed, fertilizers and labor, farmers should be unusually careful to avoid less of crops from plant diseases and insect The observance of every possible precaution against these losses is called er than the cost, either in money or
